

FOR IMMEDIATE RELEASE

Stabil Nutrition Unveils StabilOne™: A Groundbreaking Novel Ingredient for Gut Health

St. Louis, Missouri – Stabil Nutrition, an innovator in functional nutrition, proudly announces the development of **StabilOne™**, a proprietary blend of **stabilized rice bran and precooked navy bean** designed to promote optimal gut health. This science-backed ingredient blend is set to revolutionize the functional food and supplement markets by offering a **clinically supported** solution to digestive wellness.

With growing consumer awareness of the gut microbiome’s role in overall health, StabilOne™ provides a **synergistic combination of fiber, resistant starches, and essential nutrients** that support **microbiome balance, digestive function, and metabolic health**. Backed by **evidence-based research**, StabilOne™ harnesses the well-documented benefits of its core ingredients:

- **Stabilized Rice Bran** – A nutrient-dense byproduct of rice milling, stabilized rice bran is rich in dietary fiber, antioxidants, and essential fatty acids, promoting digestive health and systemic inflammation modulation.
- **Precooked Navy Bean** – A powerhouse of resistant starch and fermentable fiber, navy beans support the production of beneficial short-chain fatty acids (SCFAs), essential for gut barrier integrity and overall wellness.

“StabilOne™ represents a major leap forward in gut health innovation, combining two highly researched ingredients into a single, functional solution,” said Stabil Nutrition CEO Dallas Anthony. “With its unique formulation and extensive scientific backing, we believe StabilOne™ will set a new standard in digestive wellness.”

The benefits of StabilOne™ also include potential applications in **metabolic support, immune function, and cardiovascular wellness**. This breakthrough novel ingredient is ideal for integration into **functional foods, dietary supplements, and medical nutrition applications**.

Stabil Nutrition is committed to **delivering cutting-edge, evidence-based nutrition solutions** that enhance human health and well-being. The launch of StabilOne™ underscores this commitment, paving the way for new product innovations backed by rigorous science.
